EDUCATION

Institute of Engineering and Technology, Lucknow 2023 – Present
Bachelor of Technology in Computer Science and Engineering, CGPA - 8.41/10 Lucknow, UP

EXPERIENCE

CreditSea | SDE Intern Oct 2025 – Present

- Built a multi-channel **notification system** (SMS, WhatsApp, push notifications, email, IVR) using a **scheduler-dispatcher** design with retries and delivery **webhooks**; cut delivery latency from **2.0s to 1.3s (35%)** and surfaced live delivery rates on an internal analytics dashboard.
- Added **Redis caching** to 8 high-traffic Node.js and Express.js endpoints serving **1 million+ users**, reduced average response time from **450ms to 270ms (40%)**.
- Rewrote reporting queries as **MongoDB aggregation pipelines** with index tuning, cutting execution time from **2.0s to 1.1s (45%)** on collections of **5M+ documents**.
- Integrated third-party **REST APIs** including Surepass (Aadhaar verification) and other financial partners; added Finvu (Account Aggregator) as a fallback to Novel Patterns by routing **10% of users** to it, **reducing errors** and **load**.

BabyCode | Full Stack Developer Intern May 2025 – Jul 2025

- Shipped course purchase flows, student dashboards, and learning modules on a live **IELTS/PTE platform** using **React** and **TypeScript**.
- Built **10+ Node.js REST APIs** for course management, progress tracking, and authentication.
- Applied **SSR, code splitting, and lazy loading**, improving LCP from **4.0s to 2.0s (50%)**, and fixed **15+ production bugs**.

PROJECTS

StudyNotion – Full-Stack LMS | Live | GitHub Link

- Enabled course purchases for students and **real-time** enrollment and revenue tracking for instructors.
- Implemented **Razorpay** payment flow with server-side order creation, payment verification, and **webhook signature validation** for secure and reliable transaction management.
- Built a **RAG chatbot** using Gemini, Pinecone, and LangChain with conversation history.
- Built instructor analytics dashboards with **Chart.js**, added **rate limiting**, and automated daily Excel reports to admins via **cron jobs**.
- Tech Stack: React.js, Node.js, Express.js, MongoDB, Cloudinary, CronJobs, LangChain, Pinecone, Redis

Hedging Platform – Smart India Hackathon 2025 (National Finalist) | Live | GitHub Link

- Developed the **backend** of a crop-trading simulation platform for farmers using **Node.js**, **Express.js**, and **MongoDB**, designing **schemas** and **REST APIs** for Farmer, FPO, and Buyer roles with a price negotiation flow .
- Integrated **smart contracts** on an **Ethereum** test network using **Ethers.js** to record trades as **blockchain** proof of transaction, and connected a **Python ML** service providing 7-day and 15-day **price predictions**.
- Integrated APIs with the **Next.js** frontend, resolved **Git merge conflicts**, coordinated with teammates, and **presented** at **SIH 2025 Grand Finale**.
- Tech Stack: Next.js, TypeScript, Node.js, Express.js, MongoDB, Ethereum, Ethers.js, Python, FastAPI
